

MARUSAN TOYS

MARUSAN TOYS

NOTICE

All toys bearing the mark "MARUSAN" stand for good quality and progress. The toy manufacturing programme of MARUSAN SHOTEN, LTD. has been carefully adapted to the requirements of parents and to the wishes of children.

Here is the introduction of the "Do-It-Yourself Toy" which is recommended as the most instructive toy. By assembling the parts, you can make whatever you wish, real things as well as imaginary things. The jeep brings your masterpieces, if it is with wheels. It is possible indeed to make things without wheels, for example, table, screen, bench, etc. At the same time you can learn how to screw, unscrew, assemble and construct through play which improves creative power very much.

The assembled parts, brass-coated screws and nuts, fasteners, hard rubber wheels and jeep are all of the highest quality.

This construction jeep will give youngsters a great deal of pleasure and keep them busy the whole day long.

DIRECTION

Illustrations are shown at the beginning of the guide to the first step of assembling parts. You can go ahead to make any other things and show your work to your mother and father.

- 1) Before beginning your construction, study carefully the basic pieces in order to avoid later confusion.
- 2) At the start, limit yourself to construction of less complicated nature.
- 3) Before beginning any construction work, place required parts in order in which they will be required.
- 4) Both in construction and dismantling, proceed in a careful manner, avoiding undue haste that will result in confusion.
